ANY CLIMATE. ANY PAINT.

DeVilbiss Automotive Refinishing, a leader in the aftermarket refinishing industry, is pleased to announce that TEKNA® ProLite is now fully available in the U.S. and Canada. The spray gun is EPA and SCAQMD approved. TEKNA ProLite is engineered for all-weather performance. The spray gun is available with three new air caps for optimized performance with waterborne coatings and in varying climate conditions. The new tip and air cap design will produce tremendous finishes with the latest basecoats and clearcoats.

The spray gun is fully coated both inside and out with the amazing QuickClean™ coating which has non-stick properties resulting in incredibly fast cleanup and high corrosion resistance. QuickClean coated guns are a must for waterborne and work great with solvent-based coatings as well. TEKNA ProLite spray gun is well-balanced and ergonomically designed for increased comfort and performance. [Click here](#) for additional information on the TEKNA® ProLite.

About DeVilbiss Automotive Refinishing (www.autorefinishdevilbiss.com)
